

PRESS INFORMATION for immediate release

Classic-Automatic Dual-Time

Released in July 2009, Orient Watch Co., Ltd.' s Classic-Automatic Dual-Time watch features a newly-developed mechanical movement.

The Classic-Automatic line is Orient Watch' s leading product series, combining the functional beauty of a traditional watch with modern visibility enhancements that mark the culmination of 60 years of manufacturing know-how.

The Dual-Time watch uses the newly developed mechanical Movement 48K40, featuring a display function capable of showing the time in two countries at once. Multiple functions include a power-reserve display, which shows how many hours of operation remain in the mechanical wind, and a rotating bezel for calculation of currencies, distances, and times.
