

## PRESS INFORMATION for immediate release

---

### STYLISH AND SMART series - DUAL II

The STYLISH AND SMART series are authentic mechanical watches that are in tune with the latest trends and match perfectly well with casual, everyday clothing.

To build upon the DUAL I (DUAL ONE) that released last autumn, ORIENT WATCH releases the second line of the same concept in the DUAL II (DUAL TWO) in November 2013. It is a twin movement watch full of liveliness with a unique composition of both mechanical and quartz movements.

The single most prominent characteristic of DUAL II is that it features twin movements – mechanical movement at the 3-o'clock position of the dial and quartz at the 9-o'clock position. ORIENT developed the original design by equipping two drive movement structures (mechanical and quartz) of different power sources into a single case.

The model has a mechanical disc display at the 3 o'clock position, while the 9 o'clock position has a simple analog display. As an additional feature, the outer ring displays a monthly calendar.

The case is simple yet possesses a large, 43mm round case to increase its wrist presence. The sunburst dial is available in four colors: black, silver, gray and navy. Every model is offered with a leather strap, one of which is nubuck which makes for a spicy accent to casual fashion.
